1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with M. David Galin (41,767) on 05/18/05.

The application has been amended as follows:

In the specification:

At page 4 after line 2, "the polarization states of the two pump lights are aligned (fig. 6(b)). please insert

-- Fig. 6(c) illustrates an apparatus for monitoring $\Delta\lambda$ and providing feedback to the laser control--.

At page 6 at line 5, please replace "Fig. 7" with -- Fig. 6(c) --.

In the claims:

In claim 1, at line 3, before "exposing", please insert -- repeatedly--.

In claim 27, at line 2, before "exposing", please insert -- repeatedly--.

In claim 27, at line 3, please replace "a grating structure in a section" with -- plural grating structures in different sections"

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the original figure 7 appearing on page 4 of the drawings should be designated as figure 6(c). In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes. (See attached page)

Art Unit: 1756

3. The following is an examiner's statement of reasons for allowance: As stated before, the incorporation a detailed description of the technique from GB 2316760, in place of the reference on page 4 at lines 27-29 as required under 35 USC 112 and insert language **describing the use of plural grating exposures with stepping or movement between the exposures to form a DFB grating *without post processing into the claims*** to form the optical fiber laser with the recited differences in grating strength and identical phase shifts for the two orthogonal polarization modes is sufficient to obviate the rejections of record.. This is due to the use of post processing tuning of the phase shift in Storoy et al.. upon which the rejections are based.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J. Angebrannndt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
